Joint LLC Seminar
Thursday April 12, 15:15
The Rydberg Lecture Hall, Dep. of Physics
Marica Ericsson
University of Gothenburg
Biomedical photonics – under the skin

Abstract: Advanced optical laser scanning microscopy based on non-linear processes is unraveling new findings in biomedical research. This talk will get "under the skin" both when it comes to discussing the fundamental principles of the technology, as well as providing novel insights in biomedical research focusing on skin research. In addition, some new directions and future development will be discussed.

The Rydberg Lecture Hall is located at the Department of Physics,
Professorsgatan 1
Coffee and refreshments will be served
before the seminar, from 15:00
